PROFESSIONAL SUMMARY

Data-focused IT undergraduate and co-founder with hands-on experience designing AI-driven analytics tools, end-to-end data pipelines, and full-stack web applications. Passionate about bridging the gap between raw data and strategic decision-making — turning complexity into clarity for businesses and stakeholders. Proven ability to work across the full technical stack: from Python data pipelines and SQL databases to React/Next.js front-ends, containerised deployments, and Red Hat Linux environments. Demonstrated rapid-prototyping capability, having shipped a production-style AI platform within a single 24-hour hackathon cycle.

PROFESSIONAL EXPERIENCE

Freelance Peer Tutor

Aug 2025 – Present

Curtin University Colombo

- Improved student performance in Programming, C, and Data Structures & Algorithms by delivering structured, problem-driven sessions that accelerated concept retention for engineering and CS cohorts.
- Reduced student onboarding friction by developing comprehensive reference notes and curated example problems, shifting learners from syntax memorisation to applied problem-solving within 2–3 sessions.
- Maintained concurrent student rosters across multiple courses, demonstrating strong communication and sustained technical mentorship.

Co-Founder & Technical Lead

Jun 2025 – Nov 2025

CarbonWise

- Accelerated sustainability reporting cycles by architecting automated data pipelines that ingested, cleaned, and aggregated raw environmental metrics — enabling near-real-time stakeholder dashboards.
- Improved decision-making quality for clients by designing interactive analytics dashboards that converted complex sustainability KPIs into actionable visual insights, reducing manual reporting effort.
- Led end-to-end technical development from data collection workflow design through to deployment, ensuring scalable, maintainable systems aligned with business objectives.

KEY PROJECTS

SoloScale — AI Productivity & Workflow Scaling Platform

TypeScript · PostgreSQL · Next.js · REST API · AI Integration
<https://v0-senesh-fernando.vercel.app/projects/78772e6b-ea08-4059-a763-ed16d3f41bc2>

- Conceptualised, designed, and deployed a production-style full-stack platform within a 24-hour hackathon cycle,demonstrating rapid problem-solving and high-pressure delivery capability.
- Improved workflow scalability for creators and startups by integrating AI-powered task automation and dynamic projectmanagement features, enabling users to handle complex workflows through a single unified interface.
- Engineered a modular API-driven backend on PostgreSQL supporting scalable storage for users, projects, workflows, andanalytics — ensuring maintainability and extensibility beyond the hackathon context.
- Delivered a futuristic, performance-first UI with smooth transitions and responsive interactive components, achieving highscores on perceived performance and UX quality during judging.

Full-Stack Portfolio with Admin CMS

Next.js · React · TypeScript · Neon PostgreSQL · Tailwind CSS
<https://v0-senesh-fernando.vercel.app/projects/aa71a63f-9e65-4319-93bd-5d1812ce3d9c>

- Delivered a production-grade editorial portfolio with a custom headless CMS, enabling content updates without redeploymentand reducing content management overhead to near zero.
- Implemented type-safe end-to-end data flow using TypeScript across API routes and UI components, significantly reducingruntime errors in production.

EDUCATION

Bachelor of Information Technology (Ongoing) <i>Curtin University Colombo</i>	Feb 2025 – Present
Cambridge A-Levels — Business Studies · Computer Science <i>St. Nicholas International College, Negombo</i>	Completed Jun 2024

TECHNICAL SKILLS

Languages: Python, C, SQL, TypeScript, JavaScript	Frameworks: React, Next.js, Node.js, Tailwind CSS
Data & Databases: PostgreSQL (Neon), Data Pipelines, Analytics	DevOps & Systems: Docker, Git, Red Hat Enterprise Linux (RHEL)
Methodologies: Agile Project Management, OOP, REST API Design	

CERTIFICATIONS & AWARDS

■ Red Hat System Administration I & II - RH124, Ver. 9.3	■ Certificate of Completion: Data Science & Analytics
■ Certificate of Completion: Agile Project Management	■ BCI Codemize Hackathon — 1st Runners Up
■ Tetr Verse Pro Hackathon — Participant
